**Subject:** VB/I70 Question from Denver's Atty

Richard, Near the end of our meeting today with City/County of Denver officials, Jackie Berardini gave us her initial feedback on the draft notice of environmental condition document. She will be preparing formal comments, but she also raised the question regarding what authority we believed we had to place such a notice in a property file. She offered her opinion that neither City/County ordinance nor state law provided for such an action.

We expect her formal comments within the next 7-10 days, but thought you might want to be thinking about this particular question she raised.

Thanks,  
Steve
